RADIANT, INTENSIVE COLORS CONCEALED IN CRYSTAL

# PRECIOSA *Terra Intensive* Lining

PRECIOSA

# PRECIOSA Terra Intensive Lining

*We have expanded our popular collection with the PRECIOSA Terra Intensive finish to include the PRECIOSA Terra Intensive Lining finish in seed beads. The PRECIOSA Terra Intensive Lining finish includes distinctive color linings that enhance every design. The colorful lining concealed in the crystal creates a colorful result with a glossy effect thanks to the clear crystal glass on the surface. The transparent surface of the glass protects the linings and allows their intensive colors to stand out. The pallet of 11 color shades includes yellow, orange, pink, magenta, red, purple, blue, lime green, sea green, brown and chocolate brown. The colors of the linings correspond to the color shades in the PRECIOSA Terra Intensive collection in the glossy and matt seed bead variants. PRECIOSA Rocailles with the article number 331 19 001 present a pallet of intensive PRECIOSA Terra Intensive Linings in the most popular sizes of 11/0, 10/0, 8/0 and 6/0 with the option of larger sizes being produced.*

| o8A28 The purple lining  |                                  |

### *The properties of the PRECIOSA Terra Intensive Lining color linings*

#### **1. Abrasion resistant**

The lining is protected by a glass layer.

#### **2. Colorfastness**

No changes in the color or changes in the intensity of the shades occur during regular storage and handling. The color stability is preserved.

#### **3. The influence of cosmetics**

The lining is resistant to the regular use of cosmetics with an alcohol base.

#### **4. The influence of human sweat**

A laboratory test with human sweat showed no signs of any negative influence of the sweat on the individual linings.

#### **5. Washing**

Sewn seed beads may only be hand washed without any detergents and at a maximum temperature of 40°C.

#### **6. Stringing**

No color abrasion occurred in the hole during stringing and the decoration remained intact. The thread may be slightly colored during stringing, which is not, however, a sign of a poor quality lining.
