PRECIOSA

# Icy beauty

*Snow flakes are small miracles of nature which exist in thousands of variants. Try one option which will never melt thanks to the use of glass beads from the PRECIOSA Traditional Czech Beads™ brand to imitate snow.*

## Materials and tools:

PRECIOSA Pellet™ (P)   
111 01 339; 4 x 6 mm; 02020/21402; 18x

PRECIOSA Tee™ (T)   
111 01 364; 2 x 8 mm; 02020/21402; 12x

PRECIOSA Rocailles (R9)   
331 29 001; 9/0; 78102; 18x

0.20 mm line – length ca 70 cm;  
a sewing needle; scissors

Difficulty: 

## Procedure:

Sew through each row several times so that it is sufficiently strong. Check that all the holes are clear before stringing the beads.

### Step 1:

Alternately string 6x P and 6x T (fig. nos. 1 + 2) and tie them in a circle with a double knot (fig. no. 3). Leave about 8 cm of the end of the line free for sewing in. You can sew it in straight away so that the end of the line does not impede you or you can sew it in at the end as usual.

### Step 2:

The needle exits from a P (fig. no. 4), add 3x R9 (fig. no. 5) and thread the needle through the following P (fig. no. 6 + fig. no. 7 + fig. no. 8 – the view from the second side). Repeat this all around the circle (fig. no. 9).

### Step 3:

The needle exits from the central R9 (fig. no. 10). String 1x P, 1x T and 1x P (fig. no. 11) and thread the needle through the next central R9 (fig. no. 12). Repeat this all around the circle until the snowflake is fully enclosed (fig. no. 13 + 14).

### Step 4:

Tie a knot in the line and sew it into the nearest beads. Now, the snowflake is finished (fig. nos. 15 + 16 + 17 + 18).
