PRECIOSA

Delicate ribbon

We present the two-hole PRECIOSA Bow™ bead. Its distinctive rounded shape describes part of a small circle. The holes are placed closer to the distant edges. You can combine it well with other beads and seed beads from the range of PRECIOSA Traditional Czech Beads™. The unusual rounded shape of the PRECIOSA Bow™ Pressed Bead is perfect for combination with the largest 12 mm PRECIOSA Candy™ bead.

A carabiner; an adjusting chain;
6 and 4 mm rings.

A thin needle; a 0.20 mm nylon line; scissors;
flat nose pliers (for working with the rings);
snipping pliers.

Difficulty: 

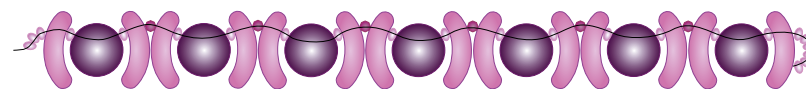

Procedure:

Step 1:
Cut off about 1 m of the line. Thread it through
the eye of the needle. Tie on 1x R at one end.
This will secure the strung material.

Step 2:

String 3x R. Then string 1x B, 1x R, 1x C, 1x R and 1x B and repeat this fragment a total of 7x.
String 1x FPB between each of these fragments a total of 6x. Finally, string 6x R. Make sure that the
inner rounded section is turned towards the C and the outer arc is turned towards the B.

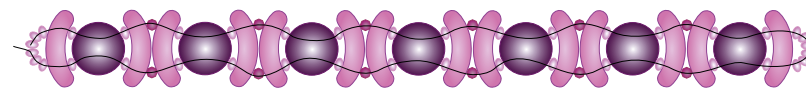

Step 3:

Thread the line through the second hole. Add R and FPB in the same gaps as during the
basic stringing. At the end, string 3x R after the last B.

Step 4:

Thread the line through everything one more time. Tie off the end of the line and pull
it into the surrounding beads and seed beads. Cut it off.

Step 5:

Thread the 6 mm rings through the outer arches from the outer R. Attach the carabiner to
one side using a 4mm ring. Cut off 8mm of the adjusting chain. Attach both end links using
a 4mm ring on the other side.
