PRECIOSA

PRECIOSA Bow™

PRECIOSA ORNELA presents a new product – the two-hole PRECIOSA Bow™ pressed bead. The beads are shaped like an extended rectangle with rounded corners. The holes are placed about a ¼ of the shape's length from the more distant edges. Thanks to its slight curve, it can be ideally combined with smaller beads and seed beads from

the PRECIOSA Traditional Czech Beads™ brand, such as PRECIOSA Rocailles, fire polished beads and pressed beads. On the other hand, the larger PRECIOSA Candy™ bead also copies the curvature of the bead very well.

The connection of two beads leads to the creation of a magic eye or the interesting shape of the letter X. Try out this new bead which we offer in the size of 3,5 x 15,5 mm.

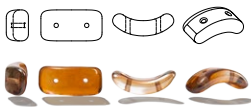

The current range of the production portfolio presents a relatively large selection of various surface finishes applied to three basic glass types: crystal, alabaster and black glass.

PRECIOSA Bow™
